INNOVATIONS FOR LIFE

INTEXSOL stands for high-tech functional textiles. We make your life easier, safer, better and more comfortable with our innovative 3D AirMesh premium products.

Our products are produced and developed with great care and precision in Germany. They are tailored to meet the particular needs of our customers.

There's only one thing on our minds:

We want to improve the quality of people's lives, whether for their daily routines or free time, and increase their ability to perform and their feeling of well-being.

What makes SpaceSit®
so **UNIQUE**?

People who sit or have to sit for a long time know the problems of normal cushions. They are hard, uncomfortable and the built-up warmth and moisture feels unpleasant.

Now there's a solution to these problems: **3D Special-Cushion** cushions with 3D AirMesh technology. They are different to everything you know. Thanks to the shock absorbing system with climate control, this innovation:

- provides unique pressure relief
- optimally cushions and supports
- prevents the build-up of moisture and warmth
- guarantees a good grip
- is hygienic
- is easy to care for
- is extremely versatile.

An innovation that noticeably improves the sitting comfort of available cushioning in an easy way.

What **CAN** SpaceSit®
do for you?

Standard cushions are no match: produced using state-of-the-art findings, **SpaceSit®** 3D cushions can extend the sitting comfort many times over in comparison with normal cushioning as these high-tech cushions comprise thousands of flexible and bouncy microfibers.

Optimal Absorption

Only floating could be better! **SpaceSit®** is like sitting on an air bed as it molds itself to the contours of your body and spreads your body weight evenly over its entire area. The excellent memory of the microfibers means that they right themselves quick as a flash every time the body weight shifts and provide accurate pressure relief in every sitting position. Circulation is improved which in turn facilitates relaxed sitting for extended periods of time without fatigue.

Natural Climate Control

Basically, 3D AirMesh is air surrounded by microfibers. This cushion of air allows the skin to breath better and directs excess heat and perspiration away from the body. In addition, pressure on the mat pumps out warm moist air and fresh air is sucked in when the pressure is removed. This ventilation effect reduces perspiration and the improved sitting climate imparts a pleasant dry and healthy feeling, which you soon won't be able to do without.

How does SpaceSit® **WORK**?

HIGH-DISTANCE TECHNOLOGY

High-distance means that 3D Air-Mesh of a thickness of more than 20 millimeters is finished by a patented process, which can only be achieved by a few machines worldwide. Our high quality 3D cushions are made from this exclusive material.

Anti-slip Feature

A special point coating on the underside ensures a stable footing and a good grip on all smooth surfaces.

Premium HYGIENE

3D AirMesh consists of only one high-tech polyester which repels moisture and dirt and is antibacterial, mold-resistant and odorless. As a result, **SpaceSit®** is especially suitable for people with allergies.

A Clean Solution

SpaceSit® is free of chemical additives, is machine washable, dries quickly and can be used again and again. For extra skin compatibility and environmental friendliness.

The cleanest seat ever!
